

At P&G Professional, we know that **the priority is to make sure your patients and residents are safe and feel at home.** That's why we provide special formulations of our trusted brands to help you create a hygienic, clean, fresh-smelling and inviting home-like environment.

## RECOMMENDED GUIDELINES

### EDUCATE & PREPARE

-  Train employees and reinforce the importance of **staying home when sick**
-  Regularly communicate your sick policies, personal hygiene etiquette, and **proper infection control procedures**
-  During an outbreak, e.g., flu season, keep close to local/regional guidelines
-  Ensure a stock of cleaning products, tools and supplies

### ENCOURAGE GOOD HABITS

-  **Handwashing**  
Frequently for at least 20 seconds – put posters up for reminders
-  **Hand sanitizing**  
Provide hand sanitizing stations to enable ease of use
-  **Cover mouth & nose**  
When coughing or sneezing
-  **Avoid close contact**  
Encourage social distancing behaviors

### BREAK THE CONTAMINATION CYCLE

-  **Do not allow germs to travel!**
-  **Clean + disinfect**  
Ensure proper cleaning and disinfecting procedures
-  **Prioritize cleaning high touch surfaces**
-  **Use an EN registered disinfectant**  
Follow label instructions

The rest of P&G Professional products are highly effective and should be used in line with HACCP protocols for good overall hygiene. Our products are proven to kill enveloped viruses and bacteria, and several are even effective on harder to kill non-enveloped viruses (like Adenovirus).

## KILL 99.99% OF CORONAVIRUSES AND BACTERIA\*
